Dear Colleagues, Dear Customers,

You will see in this Catalog health enhancing products that are clearly unique.

We hope you will find it refreshing that you will have to actively participate in understanding these formulations. We trust that you will come to the conclusion that there is a method of thinking here whose results are products that are not just “same old, same old” supplements and cannot simply just be exchanged with those of another company.

We believe that once you try our supplements, anthroposophic/homeopathic remedies, tinctures, or topical creams you will not want to be without them again.

Simply put, a conscious attempt has been made to combine substances in various forms (natural occurrence, potentized state, mineral extraction, etc), and rhythmical processes, in such a way that they help the person towards a comprehensive threefolded health for the body, yes, but also very concretely for the Soul and Spirit constitution.

To make these kinds of “remedies” has been our intention since we started practicing medicine several decades ago and then launched the company in the year 2004.

Initially True Botanica presented just three supplements. That we are now offering over one hundred carefully crafted products is of course a source of satisfaction. But it is even more gratifying that the many patients and customers that have availed themselves of these formulas have found them helpful and effective.

Of course we have incorporated into our work the latest technological advances, but our greatest inspiration has come from the research and indications given by Rudolf Steiner.

We owe him a debt of gratitude not only for his research results (showing specific connections between substances and spiritual effects) but also for outlining the research methods by which this vital work can be continued by any serious scientist.

We live in complex times where both inner and outer challenges abound and the calls for “change” are unceasing. However, the old ways that brought us here are in the first place not going to save us for the future. We have to muster the courage to embrace truly new ideas and then act on them.

Thank you for supporting this ongoing work and striving with your involvement!

Our company was incorporated in 2004 in Wisconsin. The licensed, GMP (good manufacturing practices) compliant, main facility is currently located in Hartland, WI.

We, the founders, have been actively practicing physicians for many decades and are Certified in Anthroposophical Medicine and have had a long standing interest in anthroposophical pharmaceutical processes.

We recognized early on that the modern times bring with them health problems that can be addressed only by new, innovative health products that must be designed to support both the physical and the spiritual constitution of people.

Essential processes that constitute the core of our products are done by hand, in a quiet environment conducive to an inner sense of responsibility, reverence and gratitude to the natural substances used in the making of the healing products. All products are made in the morning, under conditions when we can be reasonably assured that only a positive energy will accompany the production process. (For example no manufacturing takes place during storms, etc.)

All co-workers meet on a weekly basis as a co-worker group to share with each other important directions and developments in the company and to review valuable feedback from our customers.

We draw inspiration from the prolific work of the scientist Rudolf Steiner.

The ingredients for our formulas are carefully sourced from non-GMO, biodynamic and organic materials. The products are subjected to costly and exhaustive quality assurance tests.

Our business success is due to the effectiveness of products and the warm relationship between our company and our professional and retail customers.

Beyond the health of the individual person our products are meant to promote a socially and environmentally responsible lifestyle. We intend both an economic and healing network of communities that are connected through True Botanica products, services and education.

To further accomplish this goal the Lili Kolisko Institute came into existence in 2010. It is a not-for-profit organization working (independently of the True Botanica Corporation) to support education, research and social activities for anthroposophical health care.

The Institute makes it possible, for example, to distribute supplements and tinctures free of charge to needy individuals. Donations to the Institute are tax deductible.

For more information please visit www.koliskoinstitute.org. We thank you for your support.

WHY TRUE BOTANICA PRODUCTS?

Several features make our products unique and give them an additional effectiveness:

- A general “threefold” concept of formulation. (See full page devoted to this topic).
- The Pentas™ process. (See full page devoted to this topic).
- Ashing and salt extraction processes are used extensively in order to obtain a more “full spectrum” formula that can truly support a holistic therapeutic effect.
- Rhythmical exposure of the mother substances to the sun forces over several days.
- Proprietary, completely non-alcoholic, herbal extraction method (not just “alcohol removed”).
- Our formulas are prepared with specialized equipment unique to the US, imported from Switzerland (the Inversina® mixer). This allows novel rhythmical processes to be used.
- Special attention is given to the star constellations and weather surrounding the making of each formula.
- GMP (good manufacturing practices) rules compliant.
The “Threefold” Concept of True Botanica products

Overall we strive towards a threefold design for our formulas. The following is a brief commentary — clearly meant only as a beginning explanation with more in depth material in the specialty literature.

When a man of R. Steiner’s stature tells you that he had to research 33 years in order to firmly establish that the human constitution can be fundamentally divided into three systems of a nerves/senses organization, heart/lungs rhythmical organization, and the organization of the metabolism, and that these constitute the basis of our Thinking, Feeling and Willing, you know that this is no trivial matter.

When he then describes health as basically the harmony between these three principles, and disease as the polar opposite, and when he spends the later part of his life focused on illuminating the subtle interplays between the three principles, one knows that the duty arises to pursue this insight in order to really grasp what healing is all about.

Man’s threefoldedness is helped by the same “threefoldedness” that appears to be a law also in the rest of the entire natural world. In the mineral kingdom there are more “salty” substances that would correspond in their quality to the human nerve processes; some more “mercurial” substances like Mercury as such, yes, but also others like alcohols, all of which have rhythmical qualities; and finally more “sulfuric,” ethereal substances like fragrances, etc which correspond to the metabolic system. The plant world has its own threefoldedness in the root system, the leaves and the flower/fruit/seed organization.

At True Botanica most of our nutritional supplements and tinctures are based on these R. Steiner indications of using a variety of combinations of the three principles.

We either use:
- the three parts of one plant such as the roots, the leaves and the flowers; or
- three different plants; or
- minerals that are rhythmically processed such that the three principles are united as a whole.

The role of nutritional supplements should be not only to remove symptoms but to get to the deeper level of true health. We believe that practical observations have shown that we indeed obtain better effects with this kind of formulations.

Below are some examples of how one can generate nutritional supplements or herbal tinctures by following such a threefold design.

Our Chicory tincture for example contains:
- The salts and minerals naturally occurring in the plant and extracted through a proprietary ashing process.
- The mother tincture of the herb — a proprietary, extraction of the herb rhythmically exposed to the sun forces over several days, resulting in a very “living” mother tincture of this herb from which the final product is made.
- The potentized chicory tincture (the Pentas™ process).

Our Berberine Plus formula contains:
- The whole root of the barberry and the standardized barberry root extract berberine.
- The salts and minerals of the root itself.
- The potentized whole root of the barberry.

Our market success confirms this as a best in class product.

One of our favorite combinations is the mixing of the frankincense, gold and myrrh. Interestingly the frankincense itself is a threefold substance, technically called an olio-gum-resin. It combines in itself the “metabolic” terpenes; the “rhythmical” carbohydrates that make up the gum; and lastly the volatile oils that give it the “sulfuric” aroma. By rhythmically mixing the frankincense (supports the Feeling processes) with myrrh (supports the Will processes) and gold (supports the Thinking processes) this becomes a very special formula both from a physical and spiritual point of view.
What is unique about these products?
Potentized remedies (also called ultra-high diluted medications) have been in use for well over 100 years especially in anthroposophic and homeopathic therapies. They are generally in the OTC (over the counter) drug category.

One of the main problems consists in being able to tell whether the product contains an active potency or not. Is it any better than “just water or just the sugar pill” that it comes in?

True Botanica is presenting a unique solution to the problems by integrating into the manufacturing process a biological, statistically controlled process called the “Kolisko Validation”.

To see a full article describing the Kolisko Validation process and benefits, go to the True Botanica website (www.truebotanica.com) and in the “Health Information” > “Articles” section click on the link for “The Kolisko Validation Method”™

There are other breakthrough details and procedures that make our potentized remedies top quality. Here is a brief summary:

- All our potentized remedies are made from fresh materials. The original substances have been tested by independent labs to attest identity, purity, etc;
- The substances are then subjected to special rhythmical processes to enhance the life forces of the mother substance even more;
- The potentizing agitation is done in a reliable, reproducible and verified manner;
- The potency to go into the final product is tested by the biological germination process to verify its activity. Only once this crucial test has been successful does the potency get incorporated into the commercially available formula.

It is then called/labeled “Potency Validated” (Nobody else has this step);
- The product then goes for a second independent lab testing;
- Throughout, strict GMP (good manufacturing procedures) are followed to ensure maximal hygiene and quality.

See additional comments on each potentized product page.
**Astragalus Herbal Tincture** — as an example (only major steps shown)

1. Natural astragalus powder

2. The mother tincture is prepared by alternating between heating and cooling, and other rhythmical processes.

3. Seeds are added to the root tincture in several steps

4. Pressed total mother tincture is prepared for ashing in order to extract the herb’s naturally containing salts and minerals

5. Ashing process in the kiln

6. The finished product as will be used.

7. Product ready for sale
What is the Pentas™ Process in the True Botanica products?

The designation Pentas™ signifies a process which consists in mixing the original substance, or a diluted form thereof, with several potencies (rhythmical dilutions) of this substance. The four potencies chosen here are between D7 and D30 and are in a specified weight relationship to each other and the starting substance. They represent three energetic levels that harmonize especially well. They are patterned after the working of the life forces evident in the plant world.

According to Rudolf Steiner:

*Mother substances and lower potencies (up to D7) are indicated:*

- more in acute situations,
- work via the metabolic system and
- influence predominantly the physical and life forces.

*High potencies (like D30) exert a beneficial influence:*

- on a spiritual level,
- via the nervous system and
- address more chronic and deep seated causes.

*The middle potencies (around D14) are:*

- strengthening the rhythmical body processes such as cardiovascular and respiratory processes.

All potentizing is done solely by hand.

If water as a medium is used it has been additionally enlivened by exposure to the morning and evening sun forces.

Mixing of the various components is done with the Swiss Inversina® mixer, in order to achieve an ideal merging of the various individual parts.

Why the Addition of Trace Minerals in many of our Formulas?

Dietary trace minerals are absolutely essential for an optimal health. In a very real sense they are the fourth pillar of nutrition besides proteins, carbohydrates and fats.

Sadly, we are entering a time where many of us are not getting the daily amounts in our diet needed for both physical and especially mental health. Modern research finds that even minute deficiencies have profound negative health consequences, all the way to constituting a hidden cause of chronic disease and resulting ultimately in a shortened life span.

One would expect to meet these requirements from the simple ingestion of vegetables and fruits. However, due to a number of factors, the farm soils are more depleted today of trace minerals than in the past, such that plant products, even organically grown ones, often do not have the expected amounts of nutrient trace minerals needed for an optimal human health. Consequently, simply concentrating herbal extracts does not provide them in sufficient amounts either.

True Botanica subjects its plant extracts to special ashing and filtration procedures in order to recover as much of the mineral and trace mineral material of the herb as possible. In addition we add trace minerals from natural sources. Supplementing this way goes a long way to remedy potential nutritional deficits. Besides long term physical health benefits an immediate sense of well being and strength can be observed, a more focused awake state of the mind may be observed. These observations confirm Rudolf Steiner’s research findings that trace minerals are vitally needed in order to enable our spiritual individuality to fully engage the physical body!
Our Catalog would not be complete without at least a briefest look at the significance of this unique individuality.

That R. Steiner (1861–1925) still has to be introduced to us, 150 years after his birth, is one of the more intriguing cultural shortcomings of our time. He called his work Anthroposophy or Spiritual Science. The sheer unbelievable expanse of his accomplishments should make him “must know” for anybody:

- His collected works consist of a minimum of 360 volumes;
- The worldwide, so called biodynamic agricultural movement (beyond organic) owes its existence to his precise and incisive indications;
- His discoveries in the world of substances and their therapeutic applications led to a globally practiced anthroposophic medicine with research institutes, hospitals and pharmaceutical companies (mainly in Europe), and is counting hundreds of anthroposophically practicing physicians;
- The Waldorf School Movement is the largest non-denominational school system worldwide;
- He was an accomplished painter, sculptor, architect and writer of dramas.

Far from becoming obsolete his work is continually inspiring more people.

So what is the problem then? Basically Rudolf Steiner sees into and talks out of the reality of a spiritual world with a detailed precision that can come only from someone who actually has a direct perception of it. No speculation there. It ultimately causes us to have to take a stand, to potentially drastically require changing ourselves in profound ways.

Rudolf Steiner does give a thinking-meditative and observational path to get us to experience this path ourselves but it is not an easy journey. He has the justification to call it a “spiritual science” but science has never been easy and abandoning old ways even more difficult.

All we can say is that we have found his ideas fruitful towards gaining a “true” understanding of nature and Man (hence True Botanica®) and towards creating new health formulas. We can only invite others to have a closer look at his work and be inspired by it.

TABLETS, CAPSULES & POWDERS
This is the richest, full spectrum, frankincense (boswellia, AKBA) formula available.

The main active ingredient of boswellia — AKBA — is the most potent natural 5-lipoxygenase enzyme inhibitor. This enzyme is crucial in maintaining a normal inflammatory response.

AKBA promotes:
• a healthy respiratory system;
• a healthy joint function with a good range of motion, less stiffness;
• a healthy digestive tract;
• a high energy level, and much more

Common market available boswellia is not standardized at all or at best has 1–3% AKBA. The True Botanica AKBA Plus™ is std. to 90% AKBA, and offers 54mg of AKBA in every serving! The addition of the frankincense gum, fenugreek and Bioperine® improve bioavailability even more. This allows a person to finally be able to take enough to reach the blood levels that have been found to be effective. Our research has shown that our formula creates blood levels of several hundred ng/ml while most of our competitors showed blood levels close to zero!

Rudolf Steiner’s research adds significantly to our understanding of the spiritual forces enhanced by frankincense (boswellia), whether it is used in rituals, as a resin in the plant world or in important warmth processes in the human being.*

---

**Suggested Usage:** One to three capsules daily, or as suggested by your health care provider.

A significant formulation of microalgae containing the nutrients of Spirulina plus the carotenoid Astaxanthin!

Contains the only organic Spirulina to be certified by the US Pharmacopeia.

First a general comment of the researcher Rudolf Steiner:
Algae have a special connection to the fluids and air. They avoid a too strong connection with the earth or the “cosmic” element. That makes them especially suited to support the middle, the rhytmical system in the human being- as the system located between the extremes of the head and the abdomen. On a spiritual level this explains why algae help to improve the connection between the astral body (soul life) and the etheric body (the life forces). This explains why he recommends the use of algae in
• tired, devitalized, dreamy children;
• children that are slow learners;
• slow to execute given instructions;
• children having difficulty learning in general.

More than likely this applies to adults as well!

**Spirulina**
Conventional research shows that it has enormous nutritional and health enhancing properties:
• stimulates and maintains the immune system;
• builds the blood;
• curbs hunger;
• increases energy;
• detoxifies;
• is cardio protective;
• powerful antioxidant

The only significant carotenoid that Spirulina is missing is astaxanthin which is why the red algae containing astaxanthin have been added to the formula.

**Astaxanthin**
• Powerful support of the eye, brain, joint, cardiovascular, skin and nerve health;
• Promotes a normal CRP marker level;
• Strong antioxidant – 500 times stronger than Vitamin E;
• Accelerates exercise recovery.

#1 of “5 Foods that can add years to your life” (Ranked by AARP Magazine Sept/Oct 2006 issue)

This formula also contains Phycocyanins – a natural component of the Spirulina algae.

**Phycocyanins**
• Build blood and help support the healthy immune system;
• Are Antioxidant;
• Maintain a normal inflammation level in heart tissues;
• Stimulate stem cells differentiation in bone marrow - stem cells that then make the white blood cells that constitute the immune system and the red blood cells that are needed for multiple vital functions*.

Phycocyanins give the tablets the characteristic blue color.

**Suggested Usage:** Two tablets once daily, or as suggested by your health care provider.

The health bringing properties of the Angelica Root have been known in traditional medicine and are supported by modern science.

**Angelica supports:**
- A healthy bladder function;
- A more comfortable menstrual period;
- A relaxed state of mind;
- Relief of the occasional indigestion and mild abdominal cramping;
- Improvement of loss of appetite;

**Unique features of this formula. It contains:**
- Angelica root and its native salts and ashes (main function – relieving temporary abdominal and bladder discomfort)
- Yarrow flowers (main function – supports healthy liver and kidney functions)
- Germander herb (*Teucrium scorodonia*), potassium carbonate and potassium sulfate, in potentized form (main function – according to Rudolf Steiner’s research this combination strengthens the normal Ego function in the abdomen)

**Caution:** the constituents of angelica may sensitize the skin to UV radiation and cause skin inflammation. Prolonged sun bathing (which is not advised anyway) is best avoided while taking angelica preparations.

Including the native salts and ashes of the root into the final product conception is one of the cardinal enhancements that distinguish the TB formulas. The salts and ashes of the root do not “just” make the preparation more truly “full spectrum.” Rudolf Steiner’s research shows that minerals, especially the ones native to the plants, support physiologically the Ego organization and thus make a preparation stronger in supporting all body, soul and spirit functions. Moreover, when the minerals are obtained through an ashing process an additional light and warmth quality is enhanced in the formula.*

**Suggested Usage:** One capsule twice daily or as suggested by your healthcare provider.

This is the most full spectrum barberry root formula available. It contains the high amounts of the naturally occurring berberine alkaloid that are needed for reliable effectiveness. But more importantly, it also includes besides the actual complete natural root, standardized extracts of the main active ingredients, as well as rhythmically prepared ashes and salts derived from the root. The result is a truly holistic formula to help all three: body, mind and spirit.

**Berberine promotes:**
1. a normal sugar level;
2. a strong heart function;
3. normal cholesterol levels;
4. a normal inflammatory state;
5. a healthy bile output and digestion;
6. a healthy “upbeat mood”.
7. increased workout and exercise effectiveness

Berberine Plus can be taken with or without food.

This formula uniquely incorporates Bioperine, a special black pepper extract that greatly enhances the plasma levels of all active ingredients.

**Suggested Usage:** Two capsules once or twice daily, or as suggested by your health care provider.

FrutaFit®-Inulin, a registered trademark of Imperial-Sensus, LLC
Contains the same rich and full spectrum amounts of frankincense (boswellia) and boswellia extract (AKBA) as the AKBA Plus™ supplement.

**However, additionally it has a rhythmically prepared combination of gold, frankincense and myrrh (3K).** Based on Rudolf Steiner’s research, this adds a spiritually strengthening quality to the product and makes it truly holistic and beneficial to all three: body, soul, and spirit.

The main active ingredient of boswellia – AKBA – is the most potent natural 5-lipoxygenase enzyme inhibitor. This enzyme is crucial in maintaining a normal inflammatory response.

**AKBA promotes:**
- a healthy respiratory system;
- a healthy joint function with a good range of motion, less stiffness;
- a healthy digestive tract;
- a high energy level, and much more

Common market available boswellia is not standardized at all or at best has 1–3% AKBA. The True Botanica Boswellia 3K™ is std. to 90% AKBA, and offers 54mg of AKBA in every serving!! The addition of the 3K preparation adds an additional strengthening affect. This allows a person to finally be able to take enough to reach the blood levels that have been found to be effective. Our research has shown that our formula creates blood levels of several hundred ng/ml while most our competitors showed blood levels close to zero!

Rudolf Steiner’s research adds significantly to our understanding of the spiritual forces enhanced by frankincense (boswellia), whether it is used in rituals, as a resin in the plant world or in important warmth processes in the human being.*

**Suggested Usage:** One to three capsules daily, or as suggested by your health care provider.

This formula promotes both breast health and overall female health.

**What is special about this formula?**

- The only breast formula to contain trace minerals shown by the research of Rudolf Steiner and other traditional sources to be associated with stabilizing the energetic structure of the chest organs.
- The only breast formula to contain a uniquely concentrated frankincense (standardized to 90% AKBA as opposed to the customary commercially available 3–25% AKBA std.), plus curcumin and vitamin D3, to assist healthy inflammatory processes. Maintaining a healthy inflammatory balance is a crucial step for overall health care.
- The only breast formula to contain Bioperine® as a spice that improves the absorption of all components and increases their blood levels.
- One of the few formulas to contain HMRLignans, breakthrough herbal extracts which promote a better estrogen balance.
- Contains very high amounts of the remarkably beneficial annatto derived Tocotrienols
  - powerful stabilizers of cell health;
  - antioxidants;
  - help maintain a healthy cholesterol level;
  - assists hair growth!
- Contains cruciferous vegetable extract in order to support a shift towards the “good” estrogens.

This is indeed a formula that should be part of the daily regimen of any health conscious woman!

**Suggested Usage:** Two capsules daily, or as suggested by your health care provider.

** DAILY VALUES ARE BASED ON A 2,000 CALORIE PER DAY DIET.
The active ingredients in broccoli have long been known to have extensive detoxifying health benefits. These effects have solid scientific backing. The so called sulforaphanes enhance the phase 2 liver detoxifying stage, i.e. they make toxins water soluble. They reduce the deleterious effects of cigarette smoke, alcohol, synthetic and naturally occurring toxins, radiation, several drug, infectious agents, results of f. ex. grilled meats and more. Studies have shown that a diet including very high levels of yellow and green vegetables especially of the cruciferous family are highly significant to enhance health. Since getting a daily supply of the crucial vegetables is not always possible, or if more than a minimal amount is desired, having a daily supplement of the active detoxifying broccoli substances is clearly very important. Broccoli Plus is a true nutritional supplement that can significantly enhance the quality of your daily diet.

What is special about this Formula:
1. Contains SGS™ broccoli, the highest quality broccoli seed ingredient available.
2. Contains broccoli sprouts to aid in enhancing the active ingredients in broccoli.
3. Uniquely contains the natural salts and ashes of the native broccoli to release the “full spectrum,” energetic/spiritual benefits of the plant.

Also: Emotional benefits:
Just as Cruciferous plants contribute on a physiological level to remove unwanted toxins, on a mental level they help to overcome a feeling of stagnation, the experience of not being able to resolve “road blocks”*

Suggested usage: One capsule one time daily or as suggested by your healthcare provider.

Calcium AM-PM™

You can easily satisfy your entire daily dietary needs of calcium with this formula. Every serving provides 1,000 mg of high quality calcium.

What is special about this formula?
• Contains egg shell derived calcium. This calcium has outstanding absorption and digestive tolerability as well as a fast action time. Its qualities are enhanced by naturally occurring trace minerals and other co-factors. According to Rudolf Steiner’s research, only this and similarly derived calcium can quickly be assimilated into all the areas needed, including all the way to the teeth. Thus egg shell derived calcium is particularly important for children. (The extraction of the calcium from egg shells is done from tons of otherwise wasted egg shells. The only production by product is clean steam.)
• Contains Calcium Reservoir®, a rhythmically prepared calcium carbonate and phosphate which helps the entire digestive processes in the body. Having this Reservoir included in every serving allows the product to be taken just once a day.
• Contains specific trace minerals known to act synergistically with calcium towards both its absorption from the intestine as well as its physiological activity.*

Suggested Usage: Three capsules daily, or as suggested by your health care provider.
Throughout life, even casual walking, let alone more strenuous activities like prolonged standing, running, etc. may cause loss of flexibility and pain on motion in “normally healthy” joints. With age the sensitivity of joints will only increase.

Consuming even small amounts of undenatured collagen type II has been shown to significantly improve the metabolism and function of joints.

Studies have shown that daily supplementation with 40 mg of UC-II was well tolerated and led to improved knee joint extension. UC-II also demonstrated the potential to lengthen the period of pain free strenuous exertion and alleviate the joint pain that occasionally arises from such activities.

**Suggested Usage:** One capsule daily, or as suggested by your health care provider.

This formula contains French patented, non alcoholic, clinically proven lemon balm (*Melissa*). The restorative qualities of this plant have been legendary for centuries. With its tonic and health maintaining effects on virtually every organ of the body and mind, no wonder that Melissa is present in practically all European households.

**Melissa is known to:**

- enhance creativity through a state of alert calmness,
- relieve stress and increases a sense of well being,
- improve relationship skills on the psychological level,
- ease falling asleep at night with resulting less nervous exhaustion,
- support the immune system — through its cling effect on the autonomic system,
- reduces weather sensitivity,
- lessen anxiety and restlessness thus calming a “nervous heart”; and more.

Rudolf Seiner’s research indicates that lemon balm has the following effects — in addition to the ones mentioned above (especially when the herb is rhythmically prepared as it is here and when the natural salts of the herb are added):

- encourages energetic streams flowing from above down. This increased health lessens discomforts of the back, nerves, diaphragm, pleura, abdominal lining;
- improves “the imaginative” fantasy life;
- supports the circulation of the brain by allowing the Ego organization to penetrate deeper;
- supports the heart.*

**Suggested Usage:** One capsule twice a day, or two at night, or as suggested by your health care provider.

Curcumin Plus™

The incredible healing properties of curcumin (turmeric) extracts have been known for thousands of years. Curcumin:
• maintains a healthy inflammatory state largely through control of the COX-2 enzyme;
• supports healthy and flexible joints;
• enhances gall bladder activity and detoxification;
• sustains proper cell division in the colon, all digestive mucous membranes;
• improves mental and physical brain function;
• supports healthy aging;
• maintains normal blood sugar levels after meals;
• and much more.

Unique aspects of this formula:
• Contains curcumin of high bio-availability. The absorption is further enhanced by the patented BioPerine®, black pepper extract, shown to give up to eight times more curcumin across the intestinal barrier.
• The formula contains a uniquely full spectrum curcumin: the complete root; highly purified extracts (95% curcuminoids); rhythmically prepared curcumin root, curcumin oils, curcumin trace minerals, salts and ashes.
• Contains a uniquely high concentration of the most active extract — AKBA — of frankincense (boswellia). AKBA is the most potent natural 5-lipoxygenase inhibitor. Together with curcumin this makes a very complete formula to maintain a healthy inflammatory state.
• The rhythmically prepared — Pentas™ — portions of curcumin and AKBA ensures that the formula will have a full range beneficial effect on both physical and mental levels. *

Suggested Usage: One capsule twice daily, or as suggested by your health care provider.

Devil’s Claw Plus™

The main ingredient, the herb devil’s claw, harpagophytum procumbens, is complemented here with trace minerals, the native salts of devil’s claw and bamboo in order to result in a unique back and joints supporting formula.
• Devil’s Claw — confirmed by research to inhibit TNF-alpha and prevent collagen destruction; maintains joints and back flexibility and wellbeing; the formula contains the amount of herbal substance shown in studies to be needed to achieve satisfactory results;
• Bamboo — adds the vital force of uprightness and flexibility to the formula;
• The salts and minerals added intensify the positive effects of the overall formula.

ProCerelase® is a registered trademark of National Enzyme Company
This unique combination of highest quality bilberry, lutein, zeaxanthin, gingko, alpha lipoic acid and antioxidant minerals and vitamins:
• Supports the tired and over-used eye function
• Supports a healthy eye accommodation;
• Supports a healthy retinal and macula function;
• Lessens eye fatigue;
• Improves night vision.

One of the most fundamental pleasures and necessities in life is eye sight. Disturbingly though, by the time adults reach maturity 1 in 6 people will have some significant visual problems and shockingly after age 75 one in three seniors will have substantial loss of vision.

A healthy eye function can be supported with the above mentioned nutrients and specifically the colored pigments of plants called carotenoids, like zeaxanthin and lutein. Unfortunately, the majority of us do not have a high enough intake of fruits and vegetables in order to get an adequate amount of these pigments.

Best taken together with...
No single formulation can include absolutely all ingredients that have been shown to be beneficial to the eye health. For an ideal eye health regimen the following would be a desirable daily combination:
1. Algae Plus™ – contains astaxanthin – a carotenoid vital for eye health;
2. Chrysolith Pentas™ – a potentized peridot gemstone for eye health
3. Multivitamins Plus™*

Suggested Usage: Take one capsule three times daily.

Glucanol Plus™

An advanced natural formula for maintaining healthy sugar levels and a healthy weight.

Contains, among others:
• Madeglucyl™ the novel, patented, clinically tested, herbal extract from Madagascar and
• Chromium — as chromium picolinate, a well documented form of Chromium with proven effectiveness and bioavailability.

Fully doctor designed, tested and approved for daily use. Not known to cause hypoglycemia.

Unique features:
• Extensive research on Rudolf Steiner’s part indicates that rosemary and the trace minerals featured here (especially topaz and emerald) are valuable in strengthening the spiritual Ego forces involved in the sugar metabolism;
• Bioperine™ has been incorporated — a special black pepper extract that greatly enhances the plasma levels of all active ingredients.

Who should take Glucanol Plus™?
• Anyone wanting to maintain healthy glucose levels
• Especially significant for individuals considered to be overweight — with a BMI over 25
• People relying largely on a carbohydrate rich diet
• People experiencing excessive fatigue or mood swings after a carbohydrate meal

Glutamine Peptide

This formula significantly contributes to a positive nitrogen balance, essential to tissue repair and physical and mental well being.

Contains glutamine, a vital amino acid (not to be confused with glutamic acid, glutamate, MSG or glutathione). Several principal properties of glutamine are:
• It is a conditionally essential amino acid, i.e. in times of stress the body cannot keep up with the demand for this protein and needs supplementation from outside.
• Provides a major alternative fuel source to the brain when low blood sugar levels occur;
• It is a precursor of GABA, the anxiety relieving amino acid;
• Increases overall physiological and mental alertness;
• Helps the brain dispose of the ammonia waste;
• Assists in muscle mass development;
• Supports the immune system;
• Supports pancreatic health and function;
• Assists repair of tissues in the kidneys and liver;
• Vitally important energy source for the repair of the cells lining the intestine — makes the gut less permeable to outside particulates.

Uniquely, contains rhythmically prepared glutamine (in order to further augment the mental and spiritual benefits) and rhythmically prepared herbs that assist in proper absorption of foods from the intestinal tract (based on Rudolf Steiner’s research.)*

Suggested Usage: Mix 1–2 teaspoons in 4–6 ozs. of water or flavored drink. Take two to three times daily.

This unique formula contains not just one but two of the most intensely clinically studied yeast based probiotics. Taking these kinds of probiotics can result in both rapid intestinal relief as well as long term reduction in digestive discomfort.

Saccharomyces cerevisiae boulardii are natural yeasts that were already found decades ago to restore the normal balance of the many microorganisms that form the intestinal environment.

The original observations stem from the French explorer Henri Boulard, who during his travels in Indochina in the early 1920’s observed the many benefits for digestive health that the local people experienced from a tea made from the skins of various fruits (which contained Saccharomyces). Since then the beneficial role of Saccharomyces cerevisiae boulardii has been confirmed in a host of published studies in peer reviewed journals. Saccharomyces cerevisiae boulardii have been shown to:  
* Improve the immune system of the intestinal tract by stimulating the production of secretory IgA and IgG.  
* Detoxify the intestine by the production of a 54KDa protein protease, an enzyme that can neutralize some bacterial toxins.  
* Have a restoring effect on the intestinal mucosa by releasing several proteins which contribute to the activity of the enzymes present in the mucous layer. This ultimately leads to the repair of the intestinal cells.  
* Supports the function and availability of the lactase, sucrase and maltase enzymes.

The Pro GI+ Saccharomyces is stomach acid resistant and has been shown to be helpful in promoting normal bowel movements and reducing occasional intestinal discomforts.

The Pro SCB Saccharomyces is a more recently patented probiotic shown to bring relief in occasional abdominal/intestinal bloating and temporary digestive discomforts. In recent studies with this ingredient, persistent long term discomfort was shown to be statistically significantly reduced after taking the probiotic for as little as four weeks.

All products at True Botanica are made at a GMP compliant facility.
What is unique about this formula?

Why “Plus” in the name?

This formula contains not only a high quality amount of ivy leaf extract but also includes the salts of the native plant. This gives the composition a “PLUS” over other ivy products, and increases its effectiveness. It has proven itself to many customers who have tried it.

Ivy is known to support:

• A healthy respiratory tract (recognized claim by the German Commission E – a prestigious government body overseeing herbal supplements);
• Loosening of mucus;
• A deeper, easier breathing;
• Anti-oxidant effects;
• Maintaining a calm and quiet respiratory tract.*

Suggested Usage: One capsule twice daily or as suggested by your health care provider.

---

This uniquely formulated full-spectrum hawthorn product contains:

• Organic hawthorn berry;
• Hawthorn leaf/flower/stems
• The salts of the hawthorn plant

Hawthorn — main actions:

• **Keeps a strong, healthy heart;**
• **Increases overall exercise tolerance – even if the heart is not as strong as it should be;**
• **Lessens fatigue by invigorating the cardiovascular system (addresses an often ignored cause of fatigue);**
• **Supports healthy blood pressure;**
• Supports a healthy liver and lessens fat accumulation in the liver;
• Keep healthy levels of blood lipids (fats)
• Anti-oxidant activity especially important in obese individuals;
• Supports cellular neuro-protection;
• Lessens overall anxiety levels.

Rudolf Steiner’s research indicates that the heart and the circulatory system benefit especially from remedies made from fruits and seeds!

**Suggested Usage:** One capsule twice daily or as suggested by your health care provider.

This fast acting vegetarian formula is intended to keep the joints healthy, increase mobility and flexibility, and allow quick relief from temporary discomfort following physical stresses from work, exercise and other physical stresses such as nutritional deficiencies, aging, obesity and more.

The concept behind the formula is to unify the underlying components in such a way that “a complete plant” results: roots (devil’s claw and ginger); leaves (nettles); flowers (chamomile); fruits (schizandra); and seeds (black pepper). Thus besides the physical benefits a true holistic result may be expected.

**Other unique features include:**
- Vegetarian glucosamine (as opposed to animal sourcing such as from shrimp);
- Bioperine™ has been incorporated — a special black pepper extract that greatly enhances the plasma levels of all active ingredients;
- A mix of ingredients delivering a comprehensive support for a healthy inflammatory state:
  - Schizandra, ginger — CoX-2 enzyme inhibitors;
  - Nettles — TNF-alpha and IL-1 inhibitor in synovial tissues;
  - AKBA — the most active extract of the boswellia (frankincense) is the most potent natural 5-lipoxygenase inhibitor; here in a uniquely high concentration of 90% (as opposed to 3–25% in other commercial formulas) and a uniquely high amount of 70mg per serving.
  - Pomegranates — inhibit stimulation of matrix metalloproteinase enzymes which may lead to cartilage degradation and joint damage.
- Silicates — for the support of bone re-mineralization through increased deposition of calcium and phosphate and reduction of the number of osteoclasts as well as increase in the number of osteoblasts;
- Rosemary — supports the circulation to the joints;
- Vital trace minerals nutritionally needed for helping to build a healthy joint are included (selenium, manganese, boron);
- Biodynamic herbal preparation (oak bark, dandelion, etc), rhythmically prepared, have been added to enhance the absorption of all nutrients;
- Based on Rudolf Steiner’s research rhythmically prepared forms of trace minerals derived from chalcedony as well as tin (stannum) are included in order to increase the etheric life forces supporting the integrity of the joint functions.*

**Suggested Usage:** Two capsules twice daily, or as suggested by your health care provider.

The unusual properties of Dioscorea batatas, a wild yam, are confirmed by ancient wisdom, modern research and spiritual science. The herb offered here is of biodynamic (“super organic”) quality. This cultivar is protected under the copyrighted name of “Lightroot™”.

Dioscorea batatas, also known as shan yao or Mountain Herb in Chinese, is famous for its tonic properties. Traditionally it has been used to strengthen the lungs, the kidneys, and the spleen. It is especially indicated where there is a “leakage of fluids”.

The spiritual scientist Rudolf Steiner reveals what is probably the main reason for its effectiveness, i.e. that it has the unique property of storing the so called light ether. R. Steiner called this light ether an indispensable necessity for modern people.

The light ether storing capacity helps our understanding for its overall tonifying effect on bodily functions, but also clarifies the beneficial role in strengthening the memory and helping the meditative work.

Liver Cleanse™

This formula contains a European certified “best in class” extract of milk thistle. The fruits of this herb have long been known to support liver health and detoxification. Its European certification and standardization assures even more that the reliability and safety will be present from batch to batch. This potent variety of milk thistle is effective on all known fronts of activity of the milk thistle:

• liver cell protection;
• antioxidant quality;
• maintenance of healthy inflammatory processes, and more.

Our formula goes much beyond the milk thistle as such though.

Beside the fruits of the milk thistle we have incorporated also the seeds, the flowers, the leaves and the roots from other plants that are known to support the liver. Thus a truly full spectrum formula has resulted that can be taken daily as a detoxifying and liver supporting supplement to assist both the energetic and physical functions of the liver.

According to the research of Rudolf Steiner a healthy liver function is indispensable also for a good memory, especially in the word-finding area. An energetically weak liver is considered to be one of the causative factors behind a tendency toward excessive procrastination.*

Suggested Usage: Two capsules daily, or as suggested by your health care provider.

Lightroot Comp™

A surprisingly high number of physiological events in the human body depend on a proper functioning of the light dependent metabolism, the circadian clock. Lightroot™ helps to keep it healthy and rhythmical.

Take Lightroot Comp.™ preferably in the morning.*

Suggested Usage: One capsule twice daily, or as suggested by your health care provider.

Magnesium deficiency is alarmingly wide spread. Magnesium plays a vital role in many important functions to help maintain optimal health. Adequate magnesium levels are a major help in feeling well, improving work and play performance, enabling sleep and relaxation, and lessening anxiety.

Overall no optimal health can be achieved without adequate magnesium levels. Adult blood levels, checked by your health care provider, should be at least 2.2 mg/dl.

This “best in its category” formula provides:
• Organic magnesium citrate with a superior bioavailability; this magnesium form is found mostly in fruits and vegetables and directs the body to a healthier, alkaline state. No wonder that it is the preferred magnesium form recommended by knowledgeable therapists.
• Excellent amounts of magnesium per serving make it easy to satisfy the daily requirements with this formula. Three capsules of the formula alone already may cover 100% of the daily magnesium requirements.
• Contains the unique Magnesium Reservoir™, a magnesium combination that enhances a healthy digestive process and supports all the magnesium connected processes in the body. (The Magnesium Reservoir™ concept is based on Rudolf Steiner’s research.)

Suggested Usage: Two capsules daily, or as suggested by your health care provider.

FrutaFit®-Inulin is a registered trademark of Imperial-Sensus, LLC.
The True Botanica “multi vitamins and minerals” formula contains three categories of substances:

1. It delivers over 100% of the recommended daily dietary needs for most vitamins and basic minerals.
   - A special feature is the use of methylcobalamin B-12 — a more active, easier to metabolize B-12 form of this vitamin.

2. It includes rhythmically prepared herbs, trace minerals and spices (Bioperine) that enhance the absorption and utilization of all nutrients, and

3. It is enhanced by the energizing herb Guarana.

Guarana has been shown to increase mental alertness, improve attention in performance of complex tasks, elevate mood and contentedness and improve memory. Guarana has only a very limited amount of caffeine and many scientists now agree that its effects are probably not due to the caffeine like substances it contains but rather to its antioxidant flavonoids.

A true holistic formula intended to fulfill a threefold health support for body, soul and spirit.*

**Suggested usage:** One serving daily or as directed.

Potassium Reservoir™ Multi-Minerals SRW0345

Our physical and energetic bodies have an enormous need for potassium. The body stores about 200,000mg(!) of potassium at any one time.

Need for more potassium can be indicated by (but not exclusively): fatigue, muscle weakness, confusion, irritability, heart problems, chronic diarrhea, etc.

Regular intense exercise requires more potassium intake!

Moreover, adequate potassium levels help maintain a healthy blood pressure.

Many foods such as Swiss chard, spinach, potatoes, etc., are high in potassium but most people do not consume enough on a daily basis to achieve the recommended daily amounts of 5,000mg/day.

Unfortunately the FDA allows only 99mg of potassium per serving in any nutritional supplement. This makes the quality of the formula of paramount importance.

In order to not just supply potassium but support all the processes that are related to potassium we have added the unique Potassium Reservoir™.

Even the intake of 2–3 capsules of our formula will make a tremendous visible difference in just a few days.

(please consult with your doctor if you are already taking a prescription potassium supplementation.)

**Overall, our best in its category formula provides:**

1. **Organic potassium citrate** with a superior bioavailability; this potassium form is found mostly in fruits and vegetables and directs the body to a healthier, alkaline state. It is the preferred natural potassium form recommended by knowledgeable therapists.

2. Contains the **unique Potassium Reservoir™** a potassium combination that enhances a healthy digestive process and supports all the potassium connected processes in the body.

3. **Trace minerals** have been added to both increase absorption and help overcome the chronic trace minerals deficiencies.*

**Suggested Usage:** One to three capsules daily, or as suggested by your health care provider.

Especially formulated vegetarian capsules to further protect the probiotic bacteria from the stomach acid. After passing essentially unharmed through the stomach the capsules dis-integrate naturally in the intestinal fluid and release the good bacteria where they will do most good.

A few of the beneficial effects of the 3 probiotic strains are:

*Bacillus coagulans*:
- A Probiotic that is extremely resistant to heat, acid and bile;
- Reduces disturbance of healthy intestinal flora by stress and multiple other challenges (among other mechanisms by competing with unfriendly bacteria for adherence to intestinal walls);
- Contributes to a normal bowel movement pattern — improves regularity;
- Produces L(+)-lactic acid — the same acid needed to ferment foods such as yogurt, sourdough bread, etc. Lactic acid fermentation improves bioavailability of copper, iron, calcium, zinc, manganese, phosphorus, and other nutrients;
- Supports a healthy immune system.

*Bifidobacterium longum*:
- Supports a healthy cholesterol level;
- Helps to reduce lactose intolerance symptoms;
- Supports normal bowel movement function and diarrhea prevention; Generates lactic acid, hydrogen peroxide, and acetic acid—that increase the acidity of the intestine and reduce the incidence of unwanted intestinal bacteria;
- Reduces constipation associated with weight loss;
- Specifically, *Bifidobacterium Rosell-175* has been shown to stimulate the proliferation of intestinal epithelial cells — the first line of defense.

*Lactobacillus acidophilus*
Maintains a healthy and balanced intestinal microbiota and reduces the incidence of intestinal infections by eg. increasing mucin production.
- Frequently recommended to prevent unbalanced intestinal micro flora which can occur from various stressors; Contributes to the modulation of specific and non-specific immune responses;
- Reduces over-sensitivity to foods;
- Increases the production of beneficial antibodies; Enhances the production of inferion-gamma in active athletes;
- Creates a significantly higher sense of wellbeing, energy and less fatigue.*

**Suggested Usage:** One capsule daily, or as suggested by your health care provider.

Lactospore® is a registered trademark of Sabinsa Corp.
This formula supports the prostate in order to:
- Lessen urinary hesitation;
- Reduce frequent urge to empty the bladder — with the often accompanying sleep interruption;
- Improve sexual performance difficulties;
- Decrease the unwanted dihydrotestosterone (DHT), known to contribute to male pattern baldness and keep an overall healthy testosterone level;
- Reduce unwanted estrogen build up in mature men;
- Maintain a healthy cell division in the prostate.

Feel a physical relief but also an age appropriate sense of health and vitality.

Excellent features of the Prostate Complex™ formula include:
- Saw Palmetto — most prostate formulas fail because they include too little of this abundantly studied palm extract. Saw palmetto has clinically proven prostate benefits and contributes to longer male sexual performance.
- Lignans from Norway spruce — form enterolactones in the body which oppose DHT (dihydrotestosterone). DHT is partially responsible for prostate enlargement and has a significant role in male pattern baldness;
- Nettles — support the prostate against unwanted estrogenic influences in males;
- Tocotrienols —
  - Are the most potent fractions of Vitamin E to support healthy prostate cell division;
  - Maintain a healthy inflammatory level;
  - Assist hair growth;
  - Potent antioxidants;
  - Promote a healthy cardiovascular system;
  - Promote healthy cholesterol and triglycerides levels;
- Beta-Sitosterol — to ensure effectiveness we have included nearly double the amounts shown to be necessary in most studies. Beta Sitosterols promote normal prostaglandin activity and maintain a healthy cell division.
- Boswellia, standardized to 90% of its most potent fraction, the AKBA. Only True Botanica offers this essential component that maintains a healthy inflammation level in the prostate and sustains a healthy prostate cell division.

Unique features:
- Includes Bioperine, a special black pepper extract that greatly enhances the plasma levels of all active ingredients.

Suggested Usage: Two capsules daily, or as suggested by your health care provider.

The intended benefits of this unique, quercetin containing formula, is to support the:
• normal respiratory function;
• normal nasal mucosa;
• normal cardiovascular system;
• normal reproductive system

It also reduces the occasional environmental challenges.

Has an overall tonic effect and fights fatigue.

**Principal features:**
• Quercetin, a citrus derived bioflavonoid which inhibits the production of leukotrienes and prostaglandins has many health giving actions: it inhibits the histamine release by basophils and mast cells; strengthens the prostate gland; increases work and athletic endurance.
• Fenugreek and nettles help to stabilize the connective tissues and lessen sensitivity to outside environmental factors.
• Rudolf Steiner’s research indicates that rhythmically prepared oak bark and fruits characterized by “leathery rinds” (lemon, quince) are particularly helpful in situations where the person answers environmental challenges in an excessive manner. “In such fruits it becomes visible how form giving forces that work from the outside towards the inside are active in a particularly strong way. (They) can stimulate the astral body to be inclined toward the etheric body; the mineral content of the juices, (like) potassium, calcium, and silicic acid will, at the same time, bring about a support from the side of the Ego organization.”

**Suggested Usage:** Two capsules once daily, or as suggested by your health care provider.

Recovery Tonic™ is a unique, proprietary blend of various forms of the ashwagandha root.

Its adaptogenic properties have been known both through traditional uses and through scientific studies.

Ashwagandha (*Withania somnifera*), also known as Winter Cherry or Indian Ginseng:
- Besides being significantly tonifying it is simultaneously calming rather than over-stimulating, thus very appropriate for people who have nervous exhaustion due to stress or are recovering from acute or chronic health challenges;
- Given, in a study, as a tonic in milk for normal children (2 g per day for 60 days) it was shown to increase total plasma proteins, healthy weight, hemoglobin, and hand grip!
- Adaptogenic and tonic effects seen in animals (better weight in the new born offspring, better metabolic rate, less inflammatory markers, etc);
- Promotes a normal white cell count;
- Supports less weight loss in chronic disease states, helpful in convalescence;
- Increases resistance to cold stress;
- Supports the healthy function of the adrenal gland with a stable cortisol level;
- Promotes a normal blood pressure;
- Reduces inflammatory markers, for example decreases glycosaminoglycan content in inflammatory granulomas; decreases the inflammatory marker alpha-2-macroglobulin;
- Promotes normal cell division;
- Traditionally used as an aphrodisiac and energizing tonic.

As unique features the formula contains:
- A full spectrum of the ashwagandha root: whole root; standardized extracts for a reliable effectiveness; the naturally occurring salts and minerals of the root;
- Rhythmically prepared additional trace minerals to better enable an effectiveness at all three levels of body, mind and spirit (based on Rudolf Steiner’s indications);
- The thermo-nutrient Bioperine™, a special black pepper extract that greatly enhances the plasma levels of all active ingredients.

In general follow instructions on the bottle. For more immediate results, when a stronger effect is desired take 2 capsules three times daily for several weeks.*

**Suggested Usage:** One capsule twice daily, or as suggested by your health care provider.

Rhodiola Plus™

The Vikings already took this adaptogen, and tonic, of the rose family, before they went into battle. Rhodiola is known to support:
• Cognitive functions: improved long and short term memory; increased work productivity; improved concentration;
• Mood elevation and less anxious states;
• Overall less fatigue and an invigorated sense of well being;
• Improved work and athletic stamina (in one study exercise endurance was increased after one single dose);
• Better hand-eye coordination;
• Resistance to various physiologic stresses like cold, etc;
• A healthy cell division level in the prostate and other major organs;
• A quicker adaptation to high altitude by reducing fatigue, drowsiness, chest tightness, palpitations, vertigo, lack of attention and/or memory loss;
• May reduce the suffering of nicotine withdrawal;
• Abolished binge eating-in animal studies, by the rhodiola extract salidrosides;
• The promotion of erythropoiesis;
• Reduction of the inflammatory markers COX-2 and PLA2.

Unique features of this formula. It contains:
• The essential rhodiola root plus its native salts and ashes.

Including the native salts and ashes of the root into the final product conception is one of the cardinal enhancements that distinguish the TB formulas. The salts and ashes of the root do not “just” make the preparation more truly “full spectrum.” Rudolf Steiner’s research shows that minerals, especially the ones native to the plants, support physiologically the Ego organization and thus make a preparation stronger in supporting all body, soul and spirit functions. Moreover, when the minerals are obtained through an ashing process an additional light and warmth quality is enhanced in the formula.*

Suggested Usage: One capsule twice daily, or as suggested by your health care provider.

Serrazimes®

Serrazimes are a powerful proteolytic (protein digesting) enzyme. Serrazimes used in this formula are of non-animal origin, and are completely suitable for vegetarians.

They support and promote:
• A faster recovery after minor muscle or connective tissue injuries which can occur after exercising, workout, etc;
• A healthy inflammatory state;
• A normal blood flow, blood fibrinogen level and blood viscosity;
• A healthy, loose respiratory mucus flow from the lungs;

Should be taken on an empty stomach, ½ hour before or 2 hours after meals.

Suggested Usage: One to two capsules daily, or as suggested by your health care provider. (Best taken on an empty stomach — ½ hour before or 2 hours after meals).

This combination of calcium carbonate and enzymes fulfills a dual function:
• It alleviates the occasional heartburn – by neutralizing stomach acid;
• Continues to support the digestive processes – through enzymes that have been selected to function at this more comfortable pH level.

In vitro studies demonstrate that the chosen enzyme blend effectively replaces the stomach digestion lost to enzyme neutralization.

All three types of basic foods, carbohydrates, proteins and fats continue to be digested at a more comfortable acidity level. The relief may be perceived very quickly.

Stomach acid is an essential requirement for the digestion and absorption of many nutrients. In preparations where only an antacid is used the stomach digestion is incomplete (since most stomach enzymes do not work well in a neutral environment) and undigested food particles may cause problems: bloating, gas and discomfort in the intestinal tract and even disturbances in the immune system if undigested food particles reach the blood. Hence the advantage to a formula that combines an antacid function with digestive enzymes that function even in a changed environment.*

Throat Defense™ — Berry Flavor

Immune strength ... and fresh breath too!
- Use once daily for long term immune support;
- Use many times daily for quicker action;
- Children will love the Berry flavor.

Our mouth, ear, nose and throat are meant to be the first line of immune defense! They were designed by nature to be a formidable barrier that traps all kinds of bacteria, viruses and other agents trying to enter our bodies.

This “trap-and-destroy” barrier can be weakened by stress, use of antibiotics, heavy exercise, advancing age, and other factors. A healthy protective barrier is particularly vital in those situations when you need to be in crowded places, whether they are at:
- Work;
- Sports events;
- School;
- Travel.

With Throat Defense™, you can now support this immune barrier with breakthrough, throat-specific Probiotics and other helpful ingredients like xylitol and trace minerals.

The BLIS K12 Probiotics have a dual function: they discharge bacteria-fighting proteins and also replenish the desirable normal cells in the lining of your mouth, crowding out and making it more difficult for the “outside” invaders to establish themselves.

It turns out the BLIS K12 probiotics also fight the growth of those bacteria that cause malodor, the bad breath that we want to avoid.

Take advantage all year long of these powerful, patented, clinically tested probiotics.

Now you can have it all:
- a natural throat remedy for quick soothing relief;
- long term immune support; and
- fresh breath, too!

This is truly advanced, natural, oral care.

Also try Throat Defense Menthol.

This product is well suited for the entire family. Effective for adults, yet gentle enough for children.

**Suggested Usage:** For daily immune support: Daily approx. ¼ tsp; When more intense support needed take several times daily approx. ¼ tsp. Place content directly on the tongue; let melt slowly in the mouth and swallow.

For an optimal health to be possible, nutrients need to be taken up, in a very profound and comprehensive manner, by specialized life forces of the human body. Eating the “right” foods and even absorbing them is just not enough. They need to be utilized!

These forces underlying all nutrition processes stay dormant until they are needed. Thus they are called “a reservoir” by Rudolf Steiner. In many people this reservoir is functioning at inadequate levels resulting for example, in the feeling that foods do not satisfy, one gets tired after meals, obese fat deposits can result, the skin complexion can become sallow, vulnerability to outer and inner stresses can occur and more.

In order to re-enliven this incredibly important reservoir R. Steiner suggested a rhythmically prepared combination of calcium carbonate and calcium phosphate.

He calls this composition of substances a “nutritional supplement” and recommends that it should not be missing from any dinner table. One should add it to the food in the same way that one might spice meals or add salt and pepper, etc. This would apply both for children and adults. This is arguably the most fundamental supplementation to a meal.

One can definitely feel stronger if the nutritional reservoir is more vigorous!

The “Reservoir” is presented here as a sole ingredient. However, it has been also added to the pepper and salt formulas and to the calcium supplement. In addition, using the substances appropriate to the formula (for example, magnesium carbonate and magnesium phosphate in the Magnesium Reservoir™), the Reservoir principle has been added to the magnesium, potassium and iron supplements.

**Attention!** Please keep in mind that the calcium mentioned here is intended for the support of the general nutritional forces and is not an adequate source of nutritional calcium. For a calcium supplementation as such use the Calcium AM-PM™ formula which is indeed an excellent source of calcium.*

**Suggested Usage:** 1/8 tsp. three times daily, or as suggested by your health care provider.

This is a special ginseng containing formula that offers not only the root extract of a superior ginseng quality but also the salts that are available in the root. This extract and native salts formula is thus more “full spectrum”. The formula intends to help:

• overcome mental fatigue;
• increase work efficiency and vitality;
• improve cognitive functions;
• improve the general mood;
• focus attentiveness;
• support the immune system;
• relieve nervousness and calm abdominal complaints due to stress;
• promote a normal blood sugar.

Unique in this formula is the presence of all parts of the ginseng root, including the prongs and root fibers of the herb as well as the natural ginseng root salts!*

**Suggested Usage:** One capsule twice daily or as suggested by your health care provider.

Every year it seems that the daily recommended intake of vitamin D is going up!

The currently accepted levels seem to be at a minimum 800–1,000 IUs, and that is just the amount expected to prevent an outright vitamin D deficiency. To get additional benefits that result in a lower risk to develop a number of diseases by supporting the overall health of various body systems, even higher amounts are required.

Knowledgeable doctors place the desirable range of vitamin D in the blood above 40ng/ml.

The current formula allows great flexibility in both an easy way to maintain a desirable range as well as easy adjustments should your therapist recommend higher amounts.

**Special features of this formula:**
- Contains 2,000 IUs of vitamin D — allows great flexibility in amounts taken both for maintaining an adequate daily level as well as enabling the easy taking of higher amounts if a therapist should suggest that;
- Bioperine™ has been added in order to further stabilize the blood level of this vitamin;
- Rudolf Steiner’s research indicates that the Lightroot™ yam has the ability to store light ether in the root. We have included this herb here (as well as rhythmically prepared trace minerals) in order to further increase and facilitate the processes that are connected to the light.*

**Suggested Usage:** One capsule daily, or as suggested by your health care provider.

Hormonal challenges of the mature female body in all stages of pre-, peri-, and post menopause, can be manifested as a lack of vitality, occasional night sweats, etc. or, temporary sleep difficulty, cognitive complaints, digestive disturbances, graying of hair, and of course intermittent hot flashes, etc. All too often these are ascribed to aging. However, wellbeing and vitality can be significantly enhanced by promoting a healthy hormonal balance.

What is special about this formula?
It contains:
The essential pueraria root plus its native salts and ashes.

Including the native salts and ashes of the root into the final product conception is one of the cardinal enhancements that distinguish the TB formulas. The salts and ashes of the root do not “just” make the preparation more truly “full spectrum”’. Rudolf Steiner’s research shows that minerals, especially the ones native to the plants, support physiologically the Ego organization and thus make a preparation stronger in supporting all body, soul and spirit functions. Moreover, when the minerals are obtained through an ashing process an additional light and warmth quality is enhanced in the formula.

Pueraria mirifica (PM):
The Pueraria plant is native to Thailand where women have used this root extract effectively as a “rejuvenating” folk medicine for hundreds of years.

Traditionally it was felt that Pueraria can:
• be rejuvenating
• serve as an anti-wrinkle agent for aged and wrinkled skin
• darken white hair, and increase hair growth
• help with memory loss
• increase energy and vigor, more reflexive bodily movements
• increase blood circulation
• alleviate sleep difficulties.

In a Buddhist manuscript it was noted that pueraria “… helps to live a thousand years”.

Modern research has confirmed that pueraria contains phytoestrogens, similar to estriol, and that the herb revitalizes any organ where estrogen receptors might be located, such as bones, brain, skin, etc. Additionally, the safety data is impressive.

Latest findings show PM also has a breast cell stabilizing effect.

In conclusion, PM is a significant adaptogen that helps regulate the body’s natural metabolism and leads it to a healthy state.*

Gentian
Herbal Tincture
A Dietary Supplement

1 oz. 16.67% vol.
5M Trace Minerals 1.86 oz.  

Rudolf Steiner’s research indicates that salts and trace minerals derived from slate, sulfur, porphyry and apatite may help the life forces, soul activities and Ego forces work more deeply into the physical body:
- May be used in practically any situation as a general health support.
- Especially important when therapeutic resistance is encountered.
- Intended for use whenever a more balanced, awake state is wanted.
- Helpful in all situations where the person “does not quite feel present”.

Special features of this formula:
- The slate, sulfur, porphyry and apatite are rhythmically prepared so that their energetic value is enhanced even more.
- Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

Please read on page 8 why the addition of trace minerals is of fundamental importance to the success of this formula and your health in general!*

Suggested Usage: 20 drops (1 ml, 1/5 tsp) one to three times daily or as suggested by your health care provider.

Agnus Castus Herbal Tincture 1.86 oz.  

Chaste berry (Agnus castus) is used for:
- Helps relieve the discomfort of the premenstrual syndrome.
- Helps relieve the occasional congested breast discomfort.
- Supports a properly functioning female endocrine system.

Special features of this formula:
- A proprietary, completely non-alcoholic extraction, involving the sun forces over several days, results in a very “living” mother tincture of this herb from which the final product is made.
- The herb is also rhythmically prepared so that its energetic value is enhanced even more.
- The salts and minerals naturally occurring in the plant are added to the formula.
- Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

Please read on page 8 why the addition of trace minerals is of fundamental importance to the success of this formula and your health in general!*

**Blackthorn Tonic™ 4 oz.**

Our favorite All-Natural Tonic!
Extractions from these blue berries are known to be particularly “vitalizing” and increase a sense of wellbeing. This traditional experience is supported by the finding that blackthorn is rich in Vitamin C. (Use whenever possible vitamins and minerals sourced from a living plant rather than a synthetic manufacture!)

Rudolf Steiner calls blackthorn the preeminent strengthener of the entire life body. He describes its supporting effect as “putting a blue mantle around the whole person”.

In general take blackthorn on a daily basis for extra support of all the healthy vital functions, for energy and “get go”. Especially helpful for:
- Adrenal/Hormonal Support
- Cardiovascular Health
- Children’s Health
- Constitutional Strength
- Fatigue
- Metabolic Health
- Recovery from a weakened state
- Stress Relief

Take one teaspoon daily for overall health or multiple times a day for a stronger more immediate support.

**Suggested Usage:** 20 drops (1 ml, 1/5 tsp) one to three times daily or as suggested by your health care provider.

Chicory cum Stanno Herbal Tincture TMS 1.86 oz.  

Chicory bitters are:
- A digestive tonic.
- A support for a healthy liver, gall bladder and pancreas function.
- Helpful in detoxification programs.

**Rudolf Steiner’s research indicates that chicory:**
- Has a complex threefold activity: on the digestive tract through its bitters; on the health of the blood through its alkali components; and on the periphery through its silicates content.
- Here a characteristic anthroposophical formula is presented whereby the chicory plant is synergistically combined with the trace metal tin (stannum). This is a specific indication of R. Steiner’s that metals can be “potentized” by allowing them to be absorbed first through the plant. Stannum supports the health of the liver but also other nerve related processes.

**Special features of this formula:**
- A proprietary, completely non alcoholic extraction, involving the sun forces over several days, results in a very “living” mother tincture of this herb from which the final product is made.
- The chicory is also rhythmically prepared so that its energetic value is enhanced even more.
- The salts and minerals naturally occurring in the plant are added to the formula.
- Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)*
Elderberry Thyme Syrup™ 4 oz. SRW0010

This formula provides a:
- Soothing effect in times of temporary coughs, congestions and other general winter related challenges.
- Promotes a strong immune defense.
- Promotes a healthy respiratory system.
- Assists the easy expelling of mucous.
- Supports detoxification through healthy sweating.

**Special features of the formula:**
- Contains pure organic elderberry syrup.
- Contains xylitol, a carbohydrate known to strongly promote the health of the ears, mouth, throat and teeth.
- Contains a full spectrum thyme: the whole plant extract; the thyme oil; the thyme salts and minerals derived from the thyme ashes.*

**Suggested Serving**: For adults: 2 tsp 3–4 times daily or as directed by a health care provider; For children, 3 to 7 years, use half the adult serving.

Horsetail is known to:
• Support the kidneys and the urinary system in a comprehensive way.
• Support healthy nails and hair structure.
• Provides the body with valuable organic silicates that assist in the optimal functioning of the nervous system, connective tissues, joints, bones, and sense organs.

Rudolf Steiner's research regarding horsetail indicates:
• Here a characteristic anthroposophical formula is presented whereby the horsetail plant is sprayed as it is growing with a quartz dilution which enriches the horsetail with silica and makes the quartz more organic and able to penetrate deeper into the life forces. This is a specific indication of R. Steiner's that minerals can be “potentized” by allowing them to be absorbed first through the plant.

Special features of this formula:

Gentian Herbal Tincture 1.86 oz.  

Rudolf Steiner characterizes gentian in detail as being a plant that helps breathing processes and elimination processes on both a physical and a more spiritual level. It helps against stagnations in the head, lungs, digestion or limbs.

Gentian is a well known digestive remedy:
- Promotes stomach emptying.
- Relieves intestinal bloating, gas build up, especially the feeling that food is not passing along properly.
- May also have blood vessel relaxing properties which allow it to support a normal blood pressure.

Rudolf Steiner’s research indicates that gentian:
- Has a subtle quality of eliminating stagnation in all organs in the body. This ability extends literally from the head to the limbs. He defines this as a “breathing” quality both on a physical and spiritual level.

**Special features of this formula:**
- A proprietary, completely non alcoholic extraction, involving the sun forces over several days, results in a very “living” mother tincture of this herb from which the final product is made.
- The gentian is also rhythmically prepared so that its energetic value is enhanced even more.
- The salts and minerals naturally occurring in the plant are added to the formula.
- Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

Please read on page 8 why the addition of trace minerals is of fundamental importance to the success of this formula and your health in general!*

**Suggested Usage:** 20 drops (1 ml, 1/5 tsp) one to three times daily or as suggested by your health care provider.

Goldenrod Herbal Tincture 1.86 oz.  

The Latin name, solidago, means to make whole, and comes from the observed effect of goldenrod to promote a quicker repair of wounds. It makes the body whole again.

On a spiritual level, goldenrod has a similar effect. It helps to “scar over an old wound,” to get over an old trauma, to enable us to forget an injury that we cannot get over. In our modern times where inequities, slights, and traumas can be deep-seated, with people being unable to erase them from their mind, goldenrod may be one of the most important herbs to know about.

Modern scientific research shows that it has the ability to increase the amount of urine that is being passed from the bladder without causing, however, a loss of salts.

**Special features of this formula:**
- A proprietary, completely non alcoholic extraction, involving the sun forces over several days, results in a very “living” mother tincture of this herb from which the final product is made.
- The goldenrod also rhythmically prepared so that its energetic value is enhanced even more.
- The salts and minerals naturally occurring in the plant are added to the formula.
- Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

Please read on page 8 why the addition of trace minerals is of fundamental importance to the success of this formula and your health in general!*

Rudolf Steiner’s research indicates that Hyacinth:
• Supports normal thyroid function

Special features of this formula:
• The Hyacinth is rhythmically prepared (Pentas™ process) so that its energetic value is enhanced even more.
• This batch of Hyacinth Pentas includes pelargonium potencies made with D7, D11, D18, and D30 potencies.

Please read on page 8 why the addition of trace minerals is of fundamental importance to the success of this formula and your health in general!*

A proprietary, rhythmically prepared combination of iron carbonate and iron phosphate.

Rudolf Steiner attaches a special importance to the mineral compositions that are made from carbonates and phosphates in certain proportions to one another. Those compositions not only bring into the body the beneficial effects of the corresponding spiritual substance forces — in this case the iron forces — but more importantly they also stimulate all the nutritional forces that rest in a sort of “reservoir,” and are connected to the substance in question. (For more details about the “reservoir” principle, see the description for True Life Reservoir™ in the Tablets, Capsules, and Powders section of the catalog)

This formula supports:
• The absorption of healthy iron levels.
• Supports iron in its beneficial metabolic effects on the red blood cells, the gall bladder, and more.
• Supports the spiritual iron effects resulting in:
  n A calmer more “courageous” state of mind.
  n A clear voice.

Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

This batch of Hyacinth Pentas is made with D7, D11, D18, and D30 potencies

Special features of this formula:
• The iron is rhythmically prepared (Pentas™ process) so that its energetic value is enhanced.
• Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

Please read on page 8 why the addition of trace minerals is of fundamental importance to the success of this formula and your health in general!*

Attention: Only the rhythmically prepared iron is included here. There is not enough iron here to serve as a dietary iron source.
Jasper Pentas™ TMS 1.86 oz.

Rudolf Steiner’s research indicates that jasper supports the structure and function of:
- The spinal column and back.
- The skin.
- The hands and feet.

**Special features of this formula:**

Lungroot™ — Lemon 4 oz.

Delicious Lemon flavor! Lungroot™ is an exceptionally high quality, pelargonium root (rich in umckalin) containing product. The root of Pelargonium sidoides has been known in traditional medicine, and confirmed by modern research, to be a significant support for the immune system and support the health of the lung and upper respiratory tract. Modern European research has also confirmed other beneficial properties, like its ability to help expelling of mucus.

The following properties make this an unparalleled and unique pelargonium sidoides containing formula. We offer a product that is:
1. Full Spectrum
   a. Our product starts with a high quality extract of the whole root. It is very important that the final extract also contains water soluble parts. The final extract should be standardized for umckalin, the most active ingredient.
   b. We include then the salts and minerals of the whole root (extracted through a proprietary ashing process);
2. Completely non-alcoholic;
3. Produced with special rhythmical processes;
4. Hand made by people who really care and put their best and most positive energy into the work;
5. GMP (good manufacturing practices) compliant... of course. *

Try the Lungroot together with the Elderberry-Thyme Syrup for complete respiratory support! Also available in handy 1.5 oz Menthol flavor!

**Suggested Usage:** For quicker relief: Adults: 1 tsp (5ml) three times daily; Children under 12 years: ½ the adult dosage. For long term use: 1 tsp daily. Or as suggested by your health care provider.

Shepherd’s Purse Herbal Tincture 1.86 oz.  

SRW0031

Based on use in traditional therapies and on some research findings Shepherd’s purse seems to be:

• Reducing tensions of the premenstrual time or lessens menstrual bleeding.
• Useful in occasional nose bleeds and minor wound bleeds.
• Soothes occasional bladder discomforts.

Rudolf Steiner emphasizes particularly the tendency of this herb to allow the root forces to take over the whole plant and thus to become important in the maintaining of kidney health:

**Special features of this formula:**

• A proprietary, completely non alcoholic extraction, involving the sun forces over several days, results in a very “living” mother tincture of this herb from which the final product is made.
• The shepherd’s purse is also rhythmically prepared (Pentas TM process) so that its energetic value is enhanced even more.
• The salts and minerals naturally occurring in the plant are added to the formula.
• Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)

St. John’s Wort Herbal Tincture 1.86 oz.  

SRW0381

Some of the main uses of St. John’s Wort (Hypericum Perforatum) are to promote:

• A sense of wellbeing and upbeat mood;
• Promotes stress relief;
• A strong immune defense;
• A longer sleep pattern;
• A healthy liver and urinary bladder function;
• A normal inflammatory state through 5-lipoxygenase inhibition;
• A clean skin.

**Unique feature of this formula:**

Contains rhythmically prepared trace minerals and the naturally occurring salts of the plant in order to achieve a more pronounced effect on the mental functions.

**Suggested Usage:** 20 drops (1 ml, 1/5 tsp) one to three times daily or as suggested by your health care provider.

Topaz Pentas™ TMS 1.86 oz.  SRW0100

Rudolf Steiner’s research indicates that topaz supports the structure and function of:
- The chest and ribs.
- The sense of taste.

Special features of this formula:
- The topaz is rhythmically prepared (Pentas™ process) so that its energetic value is enhanced even more.
- Additionally, the formula contains 10 mg/serving of a naturally sourced, complete trace minerals mixture. (Salt reduced and toxic metals free.)
- This batch of Topaz Pentas was made with D7, D11, D18 and D30 potencies.

Suggested Usage: 20 drops (1 ml, 1/5 tsp) one to three times daily or as suggested by your health care provider.

Urtica Ferrum™ Tincture 1.86 oz.  SRW0081

Here a characteristic anthroposophical formula is presented whereby the nettle plant (urtica dioica) is grown while being sprayed with a finely diluted iron mist. This is a specific indication of R. Steiner's that metals can be “potentized” by allowing them to be absorbed first through the plant.

This combination formula of nettles and iron:
- Supports all iron related processes as such; improves iron absorption; supports the health of the red blood cells.
- Supports the health of the gall bladder, liver, lung and respiration.
- Supports the cardiovascular system.
- Supports appropriate feelings of courage and initiative-taking.

Special features of this formula:
- A proprietary, completely non alcoholic extraction, involving the sun forces over several days, results in a very “living” mother tincture of this herb from which the final product is made.
- The nettle (Urtica) is also rhythmically prepared so that its energetic value is enhanced even more.
- The salts and minerals naturally occurring in the plant are added to the formula.
- Contains actual small amounts of easily absorbable iron.

Attention: Even though small amounts of iron are included in this formula utilize this product in cases of iron deficiency anemia only with the guidance and under the supervision of a doctor.

Suggested Usage: 20 drops (1 ml, 1/5 tsp) one to three times daily or as suggested by your health care provider.

Ingredients: Castor oil, sulfated; Pine (Pinus sylvestri) oil; Fir (Abies balsame) oil; Spruce (Tsuga canadensis) oil; Lavender (Lavandula officinalis) oil; Juniper (Juniperus communis) oil; Almond (Prunus amygdalus) oil, biodynamic/organic, with jasper trace minerals.
Peppermint, arnica, schizandra, and other oils in an organic oil base help restore a sense of well being. Whether at work in front of a computer or traveling, carry Neck Relief™ on you for use whenever you need a quick, gentle massage and response.

Apply on the affected area every half hour as needed. Not into eyes or open wounds.

Made with organic or biodynamic oils; no toxic residues. No animal testing. Paraben free, Phthalate free, Mineral Oil free, Petrolatum free, Dye free.

This rich moisturizing scrub uses an exclusive mix to renew your skin and body inside and out. It gently removes dead cells, nourishes the skin and leaves you feeling refreshed with a silky and smooth skin.

It invigorates the circulation, enhances a sense of alert calmness!

How To Use The Salt Scrubs:
It is best to apply the salt scrub after an initial wetting of the skin through a bath or shower. Vigorously scrub either the entire body or any desired part with the salt scrub, ideally so that the skin becomes slightly red or at least feels activated. Gently rinse.

From a practical point of view, attention should be paid to the fact that the shower floor or tub bottom may become slippery due to the oil content in the salt scrub.

Arnica offers:
• Real relief; use before and after workouts.
• Restores tired muscles; supports a longer, more intense sports work out or physical labor.
• Naturally softens dry skin.

Rudolf Steiner’s research indicates that arnica applied to the skin has the ability to call upon the restorative forces from deep inside the organism to come and help the parts at the periphery. True Botanica “Real Arnica” products have the highest amount of actual arnica oil on the market.

The formula is enhanced with a unique mixture of trace minerals and soothing oils.

Made with organic or biodynamic oils; no toxic residues. No animal testing. Paraben free, Phthalate free, Mineral Oil free, Petrolatum free, Dye free.
